FEATURES

CALIVE®

Start-up Protection

01. Hold the Power button for 5 seconds to turn on the UVWand.

Smart Lock

02. Rotate UVWand 45°, it will turn off automatically.

03. Mainly used for disinfection and sterilization of small objects in daily life, such as glasses, pens, wallets, handbags, masks, toothbrushes, phones, etc.

The university's National Emerging Infectious Diseases Laboratories (NEIDL) found that a dose of $5\text{mJ}/\text{cm}^2$ resulted in "a reduction of the SARS-CoV-2 virus by 99% in 6 seconds." (SARS-CoV-2 is the more scientific name for the novel coronavirus).

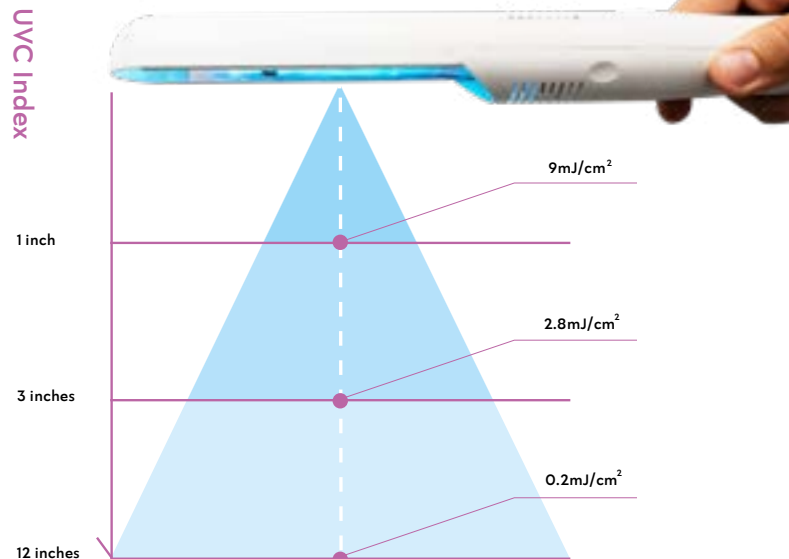

Alcohol Free

Ammonia Free

- **Disinfection rate up to 99.9%**
- UV-C sterilization disinfection light destroys the molecular structure of DNA (deoxyribonucleic acid) or RNA (ribonucleic acid) in bacterial viruses through Ultraviolet rays with a wavelength in the peak of 254nm
- **Safe design with a smart gravity lock to prevent irritation of the eyes when the operator turns the UV tube up to 45 degrees. This design will ensure the UV rays always works to scan objects only.**
- Can be conveniently carried with sleek portable design measuring
- **Use on daily personal necessities like cellphones, laptops, car keys, door handles, face masks, toothbrushes, light switches, wheel handles, etc.**
- To disinfect, hold approximately 1 inch away from the area you are cleaning for 20 seconds
- Fully charged in 40 minutes for 6–8 hours of usage with easy USB-charge that can last as long as a month.

UVC Index

APPLICATIONS

01. Family

02. Office

03. Traveling

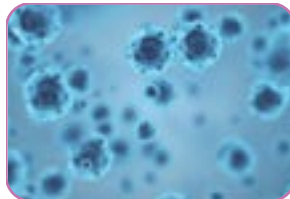

04. Restaurants

Kills up to 99.9% of Viruses, Bacteria, Germs and Molds.

Viruses

Bacteria

Germs

Molds
